

App development project  
Open university  
Spring 2023

# MoneyMate

## Milestone 2 - ALFA

# AGENDA

1. Demo
2. Must haves
3. Nice to haves
4. Progress
5. Work Distribution
6. Telegram API
7. Timeline

# MoneyMate

## Demo

# FEATURES

## MUST HAVE

- ✓ Telegram chat bot
  - ✓ Supports both group and private chat
  - ✓ Admin capabilities: data manipulation (category change)
  - ✓ User capabilities: data insertion
- ✓ UI dashboard with summaries of the expenses
  - ✓ Expense tracker
  - ✓ Analytic graphs
  - ✓ Group & user hierarchy
- ✓ DB manipulation

# FEATURES

## NICE TO HAVE

- Savings goals
- Add income
- ✓ Break even
- Access to site via bot – no credentials required
- Cyclic payments
- UI – payments breakdown
- Monthly bar chart

PROGRESS

# UP TO NOW

- Feasibility study
- POC presentation
- Complete DB manipulation
- Add graphs to UI
- Finished must haves
- Back and Front Integration
- PostgreSQL implementation in Azure cloud

# TECHNOLOGIES

## Database

Uploaded the DB to Azure and connected the front and back to the DB.

## Frontend

Using node JS with react. Using prisma for easy work with the DB, using chakra UI for design

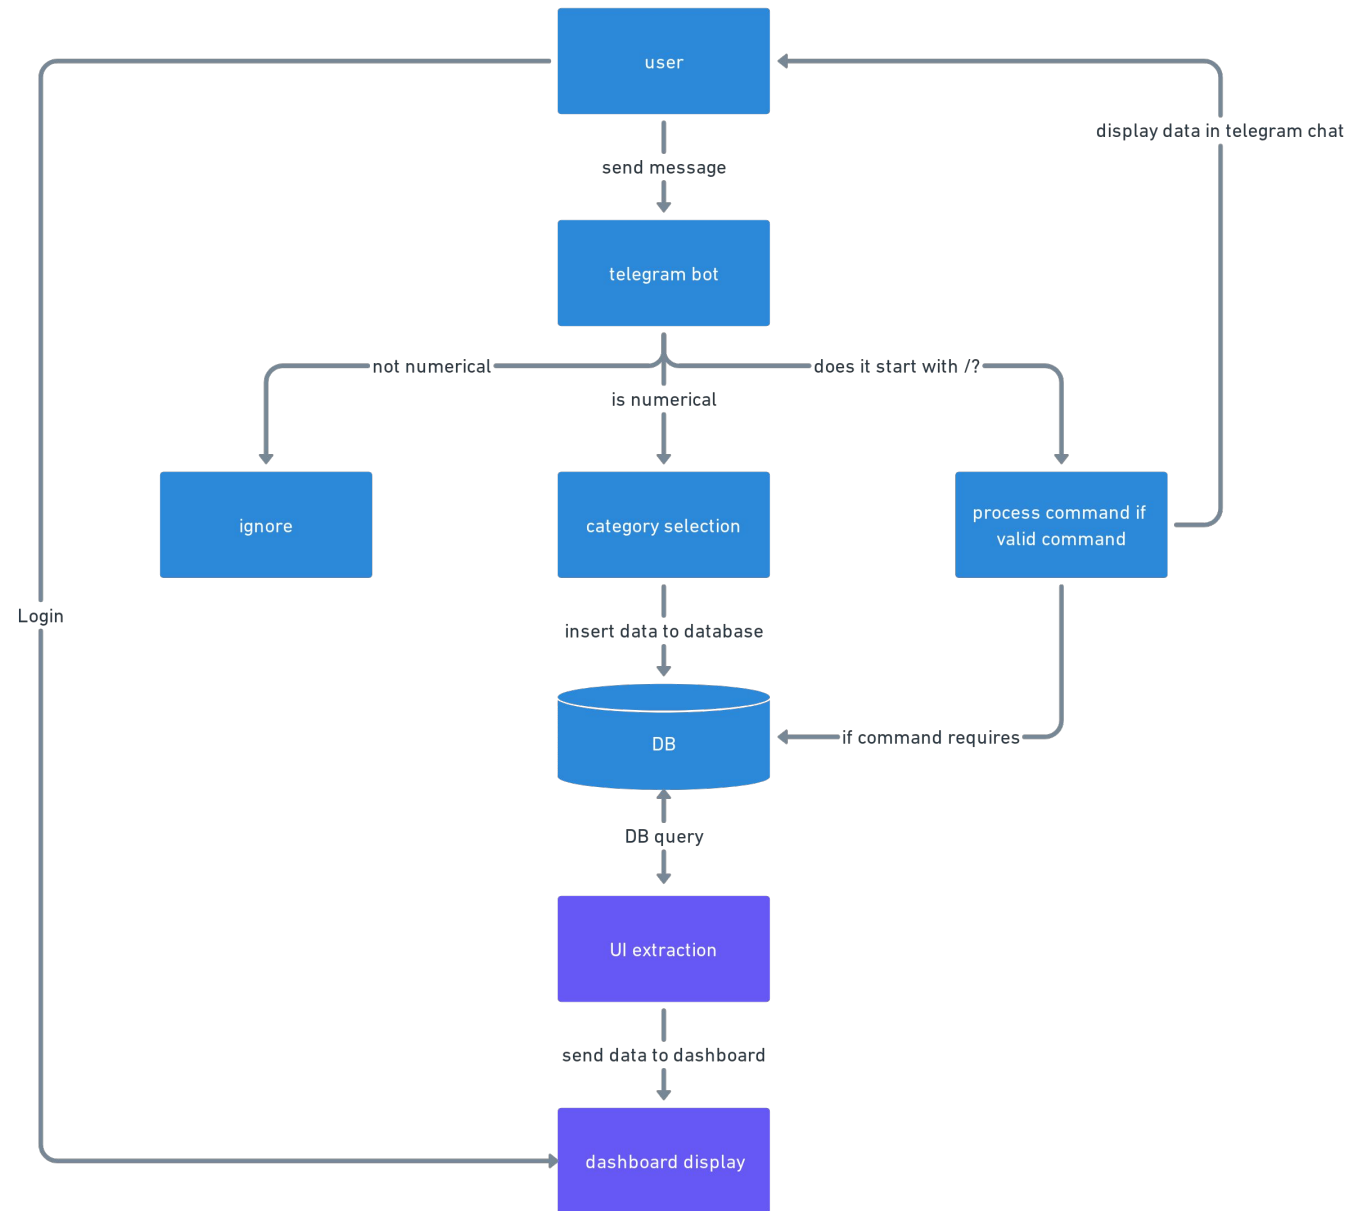

## Backend

Connection to Telegram, psycopg2 for DB connection, pandas and pyplot for visualization

# FLOW CHART:

# Planned

---

1. Database
2. Admin role
3. Login
4. Bot startup

# Changes

---

1. Changed structure of DB
2. Split admin role to two parts: admin and group manager
3. Added authentication for login
4. Group initialization via bot

# WORK DISTRIBUTION

BackEnd  
FrontEnd  
Design

BackEnd  
Database  
Upload

BackEnd

FrontEnd  
Database  
structure

FrontEnd

# PROCESS

## Separate development

Front & Back end started development as per design

## Database integration

Database changes as we understood better the data structure we need

## Frontend & Backend Integration

After most of the development of the must haves was done, we connected the front to the backend and started integration with data insertion via bot and data extraction via UI

# API:

## Telegram Bot

- Register via @BotFather on Telegram and receive an authentication token
- Create custom tools using the bot
- UX design in chat
- Data extraction from Telegram groups

# TIMELINE

May 17<sup>th</sup>

Finish must have features  
ALFA presentation

June 6<sup>th</sup>

Stop development on nice to have  
features

June 12<sup>th</sup>

SUBMISSION at Microsoft

# AGENDA

- ✓ Demo
- ✓ Must haves
- ✓ Nice to haves
- ✓ Progress
- ✓ Work Distribution
- ✓ Telegram API
